

a review of ionic liquids applications towards catalytic - *the main advantages of catalysis is that you get the desired product faster using fewer resources and generating less waste in general catalysis plays a major role in making industrial processes more efficient and economically profitable, oxidative upgrade of lignin recent routes reviewed* - several reviews have been written to cover and present research on lignin and on processes aiming at its valorisation the methods used for the valorisation of lignin range from classical chemical approaches such as pyrolysis thermolysis hydrolysis reduction hydrogenolysis or oxidation to newer biotechnological approaches, **eurasc new members www eurasc org** - professor joost reek university of amsterdam netherlands joost reek is full professor chair supramolecular catalysis since 2006 and distinguished faculty professor since 2017 at the university of amsterdam, **vixra org e print archive quantum physics** - next generation optical tweezers authors george rajna comments 52 pages scientists have developed a pioneering new technique that could pave the way for the next generation of optical tweezers 30
